eHealth
Master of Arts

eHealth combining ICT and health care

If you are interested in the application of information and communication technology in health care, you should apply for this master's degree programme. Tele medicine will become widespread and commonly used, health files and platforms will be used increasingly, mobile services will become the standard.

The curriculum of this degree programme combines business informatics, business administration, health economy and medical documentation. This combination results in a unique degree programme in Germany and will prepare you for the future and your career.

Overview

<i>Admission requirements</i>	A first degree in Economics, Computer Science, Business Informatics, Care Management, Medical Sciences or similar health care-related degrees. Your overall grade should be "good".
