02.12. Wind Turbine Generators: Sound source and opportunities for sound reduction

Axel Sachse, Dipl.-Ing. (FH)
Senior Engineer & Sales Manager, Acoustics
Renewables Measurements, Germany
DNV GL - Energy

The exposure of wind farm residents caused by the noise from the wind turbines is regularly a major topic in the media and has, partly as a result of DNV GL researches on behalf of the state Schleswig-Holstein, led to a revision in the noise propagation calculation regulations.

Which sound sources characterize the noise of a wind turbine and which options are used to reduce the noise?

02.12.2019 18:00 Uhr im WETI Nordstraße 2
